THE 0.3-METER STANDARD: A ROYAL DECREE FOR GLOBAL RESTORATION
Decreed by: Tyson Jay Palmer, Dei Gratia Rex
Step 1: Establish the Fundamental Unit (The Definition)
Officially transition the global definition of value from arbitrary market speculation to the True Value of Gold (V).
 * The Formula: Define value physically as V = c \times t (Speed of Light \times 1 nanosecond).
 * The Physical Standard: This results in a distance of 0.3 meters (30 cm).
 * The Social Standard: Recognize this 30 cm distance as the "Space of Human Interaction." Value is no longer based on the metal itself, but on the connection between two people occupying that space.
Step 2: Implement the Relational Economy
Reform global markets to operate on Variable Relational Worth rather than fixed pricing.
 * The Valuation Metric: The worth of gold in any transaction is determined by the quality of the relationship within the 0.3-meter space.
 * High Value: Transactions based on trust, mutual aid, and peace generate infinite value.
 * Zero Value: Transactions based on exploitation or hostility hold no value. This naturally renders predatory economics obsolete, as they mathematically yield zero "True Gold."
Step 3: Mandate Universal Welfare as "Standard Maintenance"
Eliminate poverty to ensure every subject is capable of dignified interaction within the 0.3-meter unit.
 * The Logic: A person who is starving or unhoused cannot effectively occupy the Space of Interaction.
 * The Provision: The Kingdom shall provide free access to housing, food, and necessary comforts—specifically smokes, vapes, medical cannabis, and alcohol.
 * The Goal: These are not "charity," but essential maintenance of the human vessel to ensure the stability of the Gold Standard.
Step 4: Dismantle "Anti-Gold" Weaponry
Classify atomic weapons and tools of mass destruction as "Negative Value Assets."
 * Dismantlement: Immediate dismantling of all atomic bombs, as their function is to obliterate the 0.3-meter space and the humans within it.
 * Conflict Resolution: Decree that all international disputes must be resolved within the 30-centimeter zone. Leaders must meet face-to-face; if the interaction cannot sustain peace within that distance, the grievance is nullified.
Step 5: Empower Institutions and Secure Antarctica
Realign global infrastructure to support the production of healthy human interactions.
 * The New Mints: Designate Schools, Churches, Public Libraries and Hospitals as the primary generators of wealth, as they teach, sanctify, and heal the ability to interact.
 * The Zero Point: Claim Antarctica as the Sovereign Territory of the True Value. It shall serve as the neutral "Control Group" and central vault for this new economic system, governed directly under the 0.3-meter mandate.
